

**ReVireo**

# 90 Cuyler Road

## Overview

Material Design + Build specializes in high-performance design and construction. ReVireo worked with Material Design + Build to achieve their goal of a high-efficiency single-family home in Princeton, NJ measuring 1,092 square feet.

ReVireo worked with Material Design + Build from the start of the project to qualify the project for ENERGY STAR Homes, Indoor airPLUS, and DOE Zero Energy Ready Home (ZERH) certifications and to satisfy New Jersey energy code. ReVireo provided energy modeling and design consulting services, as well as performed inspections and testing during construction to verify the project was built to all of the certification standards. ReVireo also managed the process of applying rebates from the New Jersey Clean Energy Program, from which Material Design + Build received over \$6,000.
