

ReVireo

44 Ironia Road

Overview

Q Built Homes developed and constructed a new single-family residence in Mt. Olive, New Jersey, with the goal of achieving ENERGY STAR Single-Family New Homes v3.2 certification and DOE Zero Energy Ready Home (ZERH) v2 certification, which includes Indoor airPLUS certification. These programs promote high-performance, energy-efficient homes designed to enhance comfort and improved indoor air quality.

ReVireo delivered comprehensive energy modeling and design consulting to guide the project in achieving the latest program requirements for ENERGY STAR, DOE Zero Energy Ready Home (ZERH), and Indoor airPLUS certifications. Through hands-on technical support, inspection services, and management of all certifications and rebates, the project successfully obtained the targeted certifications and available incentives.

The project qualified for over \$7,000 in incentives from the New Jersey Clean Energy Program (NJCEP) and an additional \$5,000 through the Federal Section 45L Tax Credit, totaling over \$12,000 in incentives. This project exemplifies partnership, trust, and collaboration, achieving its goals while effectively utilizing available state rebates and federal incentives.
