

ReVireo®

Applecross Country Club

Overview

Applecross Country Club by Pulte Homes is a multi-faceted community located in Downingtown, Pennsylvania just 40 minutes from Philadelphia. ReVireo came into this incredible community during the construction of their townhomes section. The Applecross community is picturesquely situated on an 18-hole golf course with an abundance and wide-range of exciting on-site amenities/attractions for new homeowners.

ReVireo worked closely with PulteGroup and the Applecross community team to ensure that each unit would meet and/or exceed its project goal of complying with the Pennsylvania 2009 IECC. The consulting process and due diligence starts as early as the design phase of the project followed by the permitting of each home. The ReVireo team follows each home through the different milestones of construction through completion and our team of consultants/inspectors provide third-party review and verification of each unit to ensure the energy code compliance goals were met. This means that townhomes in the Applecross community are more energy efficient than a typical resale townhome in Pennsylvania ultimately helping homebuyers make a sound investment.
