

**ReVireo**

# Schoolhouse Square

## Overview

These affordable townhomes, located in Neptune, NJ, are the winner of the 2010 Governor's Excellence in Housing Award. Built to meet NJHMFA green building requirements, these homes are all certified under the ENERGY STAR program.

In addition to providing energy modeling and consulting to ensure all homes met various NJHMFA program guidelines, ReVireo also performed inspections to verify ENERGY STAR certification and processed rebates for each home. Furthermore, ReVireo maximized incentives by providing consulting and documentation for TRF Development Partners to receive a tax credit for each home from the Federal Energy Efficient New Homes Tax Credit for Home Builders.

"ReVireo has impressed us with their efficient, professional manner – an approach that not only inspires confidence but also generates the results we want. They have a great team that always has all the necessary resources and information regarding the latest news in energy efficiency. They provide us with valuable recommendations on how to build homes with better energy ratings and inspect all of our homes to make sure we are providing savings for our future homeowners." – Hanifah Nakalembe, Project Manager
